Kuldip Karangiya

+91 9316278268 | Ahmedabad, Gujarat | Portfolio github.com/Kuldip-karangiya
kuldipkarangiya11233@gmail.com AI/ML Developer linkedin.com/in/kuldip07

AI/ML and Backend Developer with nearly 3 years of hands-on experience designing and deploying production-grade machine-learning systems and scalable backend services. Experienced in LLM-assisted healthcare workflows, asynchronous data pipelines, and AI-driven logistics operations using Python and FastAPI. Skilled at turning unstructured email and medical records into reviewable workflows, reports, and actionable structured data.

SKILLS

Programming & Backend: Python, SQL, FastAPI, SQLAlchemy, Pydantic, REST APIs, WebSockets, microservices, async data pipelines
AI / Machine Learning: Classification, recommendation systems, forecasting, Generative AI, LLM workflows, RAG, LangGraph, LangChain
NLP & Computer Vision: spaCy, prompt engineering, AI extraction, YOLO, ResNet50, Pyecharts, Playwright
Databases & Cloud: PostgreSQL, Redis, Google Cloud Run, GCS, AWS S3, Azure Blob Storage, Docker, Kubernetes/Helm
Testing & Tooling: Git, Pytest, GitHub Actions, CI/CD, Next.js, React, TypeScript, Tailwind CSS, Radix UI, React Query

EXPERIENCE

Data Scientist | Bitontree Solutions, Ahmedabad **Jul 2025 - Present**

- Engineer FastAPI services and asynchronous data workflows for a healthcare platform, supporting medical-record ingestion, structured clinical data, report generation, and real-time delivery.
- Automate clinical data-quality and deduplication flows with validation, canonicalization, PostgreSQL advisory locks, and Redis-backed background processing.
- Strengthen production reliability through retry-aware workflows, signed-file delivery, Dockerized services, and test coverage for release-ready backend changes.

AI/ML Developer | AUM Image Engineering Pvt. Ltd., Ahmedabad **Dec 2023 - Jul 2025**

- Engineered ML applications for recommendation, classification, forecasting, and NLP use cases; improved data preparation, model evaluation, and pipeline reliability.
- Optimized NLP preprocessing with spaCy-based workflows for query understanding, classification, and data normalization.
- Integrated weather and subsidy REST feeds into an advisory workflow, turning farmer questions into contextual guidance.

PROJECTS

N1 Healthcare | *Jun 2025 - Present* | *FastAPI, PostgreSQL, Redis, LangChain, LLMs, S3/GCS, Docker, Kubernetes*

- Engineered FastAPI services across a 19-repository healthcare platform with roughly 35 API route modules, supporting medical records, clinical entities, reports, and patient workflows.
- Automated a resilient PDF-record pipeline: secure uploads to object storage, Redis-based processing, LLM-guided page selection, and specialized extraction of biomarkers, diagnoses, procedures, and genetics.
- Hardened long-running processing and report delivery with validation, deduplication, retries, dead-letter queues, checkpoints, signed URLs, and WebSocket progress updates.
- Created Pyecharts and Playwright visualization flows plus automated PDF/DOCX report output for personalized clinical-report delivery.

LogiAI OM | *Logistics Order Management* | *FastAPI, PostgreSQL, LangGraph, Next.js, React*

- Architected a 3-service order-management platform with 195 API routes and 14 controlled lifecycle statuses, connecting email intake, RFQs, vendor pricing, customer quotations, and operations handover.
- Automated IMAP and Gmail Pub/Sub mail intake with LangGraph classification and RFQ/pricing extraction; saved risky updates as reviewable drafts with an audit trail for manual overrides.
- Streamlined vendor comparison, margins, fixed charges, DAP/DDP handling, quote templates, duplicate warnings, guarded quote cloning, and follow-ups to prevent missed actions.

Intelligent Farm Advisory Chatbot | *Dec 2024 - Mar 2025* | *LangChain, spaCy, Python, REST APIs*

- Engineered an NLP/LLM advisory chatbot that interprets farmer questions and delivers weather alerts, pest guidance, and subsidy information through conversational workflows.
- Integrated live weather and subsidy feeds, giving each response the context needed for more relevant, actionable guidance.

Tiles Recommendation System | *Jan 2024 - May 2024* | *ResNet50, k-NN, Streamlit*

- Engineered a ResNet50 and k-NN visual recommendation pipeline to match similar tile designs from a product-image catalog.
- Created a Streamlit interface for browsing recommendations and visually comparing similar tile options.

LinkedIn Parser | *Jan 2023 - Dec 2023* | *Python, NLP, ranking*

- Automated profile ingestion that parses LinkedIn profiles into structured candidate attributes for search and shortlisting.
- Designed ranking logic that scores candidate skill and experience signals to support recruiter review.

EDUCATION

B.Tech in Agricultural Information Technology 2020 - 2024
Anand Agricultural University, Anand

High School in Science 2018 - 2020
Delta Science School

CERTIFICATIONS

- Coursera: Crash Course on Python.
